REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The pending claims are claims 11-26. Claims 1-10 were cancelled.

The base claims are claims 11, 13 and 20. They can be summarized as follows:

Claim 11 covers a decorative material comprising:

- two polarizers, each having a controlled direction of polarization axis,
- at least one phase-shifting plate between the polarizers,

wherein the plate is a continuous layer of an optically anisotropic material containing regions having different optical properties.

Claim 13 covers a decorative material comprising:

- two polarizers, with each polarizer having a controlled direction of polarization axis, at least one of them contains several elements differing by directions of their polarization axes, and
- at least one phase-shifting plate between the polarizers,

wherein the plate is a continuous layer of an optically anisotropic material.

Claim 20 covers a decorative material comprising:

- a polarizer having a controlled direction of polarization axis,
- a reflecting layer, and
- at least one phase-shifting plate between the polarizer and the reflecting layer,

wherein the plate is a continuous layer of an optically anisotropic material containing regions having different optical properties.

Art Unit: 1772

The prior art of record fails to teach or suggest decorative materials having all of the features of claims 11, 13 or 20.

The examiner has been persuaded by applicants' comments concerning the differences between their claims and the prior art, as those differences were discussed on pages 5-6 of the 01 June 2004 response.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
